DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Information Disclosure Statement

2. The information disclosure statement (IDS) submitted on 2/13/04, the information disclosure statement is being considered by the examiner.

Drawings

3. The Examiner has approved drawings filed on 2/13/04.

Claim Rejections - 35 USC § 112

4. Claims 1 -21 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 2 defines the limitation of "raytracing". Examiner does not clearly understand in the body of the claim, how the "raytracing" is used to render the claim a multi-dimensional digital image. Furthermore, there is no clear out put image from the steps defined by using setting up variables of a multi-dimensional digital differential analyzer (DDA) using multiplications only, wherein for each axis of said multi-dimensional space, a numerator holds the progress within a cell along that axis and a denominator describes a size condition causing said DDA to step to a next cell. What is the output of this claim is it just multiplication of each axis in multi-dimensional space based on numerator and denominator of the cell which describes the size of the cell or

is it basically mathematical expression of the out of the cell as recited vague and unclear. Please need explanation. Similarly this applies to other independent claims.
